

CYBERLOCK FURNITURE LOCKS

The CL range is an extremely versatile series of cabinet locks. CL locks are manufactured in Thailand using precision German engineering. CL products feature a flexible barrel removal system and several different key series so you can offer your customers a range of keying options & security levels. The CL range includes the standard: Cupboard locks, Push locks, Multi-drawer locks and Cam locks. AND includes the less common: Tambour locks

Two-way locks Double-throw locks and Slam locks. The versatility comes in the fact that ALL the above locks are removable barrel locks that are available in: Standard security with 1350 differs, High-security dimple with 800 differs The popular 60,000 series Of course, all the CL locks suit both metal and timber cabinets and can be keyed alike

COMBINATION LOCKS

- New knob design allows an easier, more positive grip and offers a better turning action
- Ideal for lockers
- Easy to change the code
- Left and right hand models
- Comes with 2 settings public or personal
- Public is where you can use a different code each time you open the locker, ideal for single use lockers
- Personal is where you can use the same code all the time and someone else can not change the code on you whilst the door is opened
- Also available is a code finding key CL 4 dial combo lock CFKCL001
- Does not come with a code changing key for security reasons. If needed, this needs to be purchased at the time of ordering
- Competitively priced
- Easy to install
- Suits timber or metal doors
- Great streamlined design
